Profit Is The Name Of The Game!

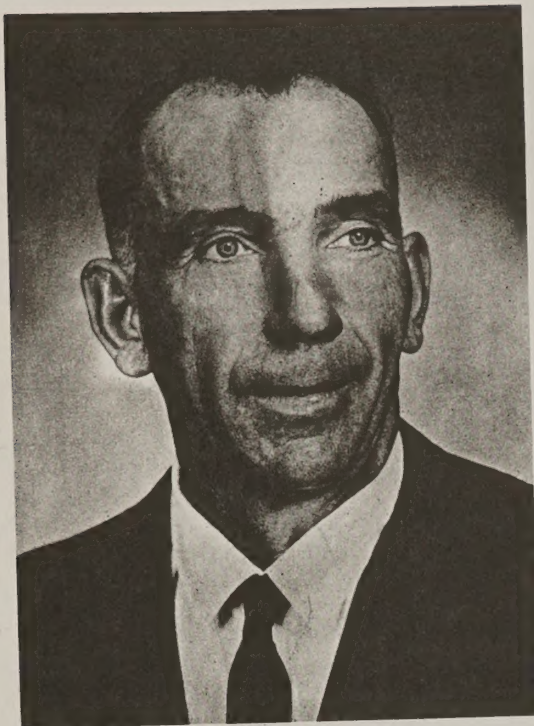

Yes, sir, we are all in the cattle business to make money. That's why Omaha is so important to the Shorthorn and Polled Shorthorn industry. For 55 years, the profit-making kind of sires for registered and commercial breeders have been offered. Well over 4,000 bulls have gone through this sale. Year after year, the buyer's lists are made up of repeat customers. Why? Because they got their money's worth.

The very fact that Omaha has been an important sale for 55 years tells us that it has been a successful market. We couldn't have had this many sales without customers. The fact that we have had healthy buyer support indicates the quality that is annually offered.

This year's sale should contain the strongest set of both Shorthorns and Polled Shorthorns offered in some years. Consignors indicate that they are bringing their best.

Best be on hand February 10th and take home a "BIG HELPING OF HERD BULL POWER".

We purchased Shorthorn bulls to get a better calving percentage, a heavier calf, and a better feeding animal. Shorthorn crossbreds wean about 10 per cent heavier than straightbreds of other breeds. I think the Shorthorn cross will eliminate a lot of the cancer eye and womb troubles of the Hereford."

What Is A Shorthorn Bull Worth?

What is a good Shorthorn or Polled Shorthorn commercial bull worth? Those of you who have had experience with Shorthorns know their superior profit-making ability and have a figure in mind. For those of you who have not had experience with Shorthorns, we cite this story . . .

Ray Holder, Harrisonville, Mo., used a Shorthorn bull on 20 cows of another beef breed. He used a bull of the same breed as the cows on 20 others.

Nineteen crossbred calves resulted. These were developed the same way and on the same feed as his straightbred calves. At the end of eight months, when sold, the cross bred averaged 189 lbs. a head more than the straightbreds and sold for the same price. The heifers sold for \$20.00 per cwt. and the steers for \$23.00.

A little arithmetic shows that the Shorthorn bull added \$43.47 to the value of every steer calf and \$37.80 to each heifer calf. If ten of these were steers and nine heifers, the added return from using a Shorthorn bull was \$774.90 on just one calf crop of 19 head.

Good Shorthorn bulls will make you money. We have the profit-making kind in this sale.
